Dear Reader,

Welcome to the Directory of 'IFOAM - Organics International' Affiliates 2015!

In this year's edition of our Directory, you will find the contact details of over 800 organizations from more than 120 countries, plus the faces of the many people who support 'IFOAM - Organics International' through individual membership.

We are pleased to welcome many new affiliates to the organic movement as well as several recently established Self-organized Structures. This growth and expansion speaks for an ever-increasing commitment to organic.

The uniqueness of our membership stems from its diversity: in this Directory you will not only find organizations from different geographical areas of the world, you will see a multiplicity of areas of organic activity and covering every section of the value chain.

As an Affiliate you benefit from exclusive discounts, so do not miss the opportunity to make full use of your membership benefits! And if you are not yet an Affiliate of 'IFOAM - Organics International', why not join today?

We wish you happy reading!

ABOUT THIS DIRECTORY

The 'IFOAM - Organics International' Membership E-Directory 2015 contains the contact details and other relevant information, such as key fields of activities of all our Members and Associates. The Directory reflects the membership situation as of December 2014 with the most up-to-date information available to us, including many new e-mail and website addresses. This Directory lists all our **Members** and **Associates** alphabetically by their respective countries and/or territories. Individual **Supporters** are listed at the end of this E-Directory, for you to know who is connected as an individual to the global organic movement. Within each country and/or territory, the Members (companies, institutions and associations that are predominantly active in organic and thus have the right to vote in the General Assembly of 'IFOAM - Organics International') and Associates (companies, institutions and associations that are not yet predominately involved in organic) are listed in alphabetical order by their full name. The

contact details of our Members and Associates are complemented with their logo, symbol or trademark wherever known and available. A description of the field(s) of activity of the organization is also provided.

In order to keep the Membership E-Directory updated, please inform us of any address changes or errors that you may notice. The next edition of this Directory will be available in early 2015.

Please be aware that **membership** in 'IFOAM - Organics International' is different from **IFOAM Accreditation**. The IFOAM Accreditation Program (IAP) evaluates the practices of Certification Bodies. Marketing products that are certified by an IFOAM Accredited Certification Body do not infer membership in 'IFOAM - Organics International' and, conversely, membership does not imply or constitute IFOAM Accreditation. Certification Bodies accredited by the IOAS according to the IAP (as of Dec. 2014) are marked in this Directory.

WHY JOIN?

We occupy an unchallenged position as the international umbrella organization of the organic world, i.e. all stakeholders contributing to the organic vision, which allows it to unite, lead and assist the organic movement (all affiliates of 'IFOAM - Organics International') in its full diversity, while creating a common voice on relevant organic issues. It implements the will of its broad based constituency with affiliates in 120 countries and is governed by a world board originating from all the continents. The 'IFOAM - Organics International' Action Group comprises of self-organized regional bodies, sector platforms and a daughter organization.

JOIN US - TOGETHER WE ARE STRONG!

Our membership is as diverse as the organic world itself. It includes Members, i.e. organizations whose activities are predominantly organic, Associates, i.e. organizations whose activities in organic represent less than 50% of their turnover, and Supporters, individual people who want to support the organic alternative.

THE BENEFITS OF JOINING US:

- 1. Our advocacy work.** See Organic Agriculture represented in international policy debates and positioned as a solution for global changes.
 - 2. Networking Opportunities.** Exchange ideas in a community of like-minded peers and develop partnerships.
 - 3. Global Organic Decision Making.** Participate in the processes shaping the agenda for the global organic movement.
 - 4. Resources & Discounts.** We have a wealth of knowledge that we share via our website, publications and events. Benefit from discounts of typically 50%.
 - 5. Partnering Opportunities.** Develop, with 'IFOAM - Organics International', joint projects or initiatives.
 - 6. Visibility.** Be listed on our website and see your logo appear in the Directory. Share your stories through our publications or host an 'IFOAM - Organics International' event.
- Be Part of the Global Organic Movement.*** Many of our Affiliates join us to support a cause you believe in. Whatever your reasons for joining, your membership helps us pursue our mission.

MAKE A DIFFERENCE. APPLY TODAY.

ABOUT US

MISSION

Lead, unite and assist the organic movement in its full diversity.

VALUES

'IFOAM - Organics International' acts in a fair, inclusive and participatory manner and highly appreciates the diversity of the Organic Agriculture Movement. It works professionally, reliably and transparently and is open to innovative approaches to address challenges and opportunities.

VISION

Worldwide adoption of ecologically, socially and economically sound systems, based on the Principles of Organic Agriculture.

OBJECTIVES

- A common identity of well-informed organic stakeholders;
- Organic farming systems are recognized as contributors to the solving of global challenges and sustainable development;
- Worldwide harmonization of all organic standards based on equivalence and inclusion in the Family of Standards and the promotion of alternative guarantee systems;
- Programs offer institutional solutions to the organic movement;
- Well-established capacity of organic leaders around the world.

STRATEGY

'IFOAM - Organics International,' with its dual identity of umbrella organization and global action network, offers to its clients financially viable services that are relevant to the Organic Movement and for achieving its goals. It has identified five pillars of actions on which it rest its long term strategy:

UMBRELLA	Uniting the Organic Movement	<i>More...</i>
VALUE CHAIN	Facilitating Production & Trade	<i>More...</i>
ADVOCACY	Promoting Sustainability in Agriculture	<i>More...</i>
PROGRAMS	Assisting Organic Development	<i>More...</i>
ACADEMY	Building Organic Leaders' Capacity	<i>More...</i>

'IFOAM - ORGANICS INTERNATIONAL'

DEFINING ORGANIC LANDMARKS SINCE 1972

THE DEFINITION OF ORGANIC AGRICULTURE

Organic Agriculture is a production system that sustains the health of soils, ecosystems and people. It relies on ecological processes, biodiversity and cycles adapted to local conditions, rather than the use of inputs with adverse effects. Organic Agriculture combines tradition, innovation and science to benefit the shared environment and promote fair relationships and a good quality of life for all involved.

THE PRINCIPLES OF ORGANIC AGRICULTURE

Organic Agriculture is based on the principles of health, ecology, fairness and care.

THE SCOPE OF ORGANIC AGRICULTURE

IFOAM regards any system that is based on the Principles of Organic Agriculture and uses organic methods, as 'Organic Agriculture' and any farmer practicing such a system as an 'organic farmer'. This includes various forms of certified and non-certified Organic Agriculture. Guarantee Systems may be for instance third party certification, including group certification, as well as participatory guarantee systems.

That's Organic - Worldwide.

Read viewed with Adobe Reader

The history of IFOAM contains all standards officially endorsed as organic by the Organic Movement, based on their experience with the Common Objectives and Requirements of Organic Standards. Both private standards and government regulations are admissible.

STANDARDS & REGULATIONS: THAT'S ORGANIC WORLDWIDE

The IFOAM Family of Standards draws the line between organic and not organic. It contains all standards and regulations that have passed an equivalence assessment against a normative reference approved by our membership. 'IFOAM - Organics International' encourages governments and standard users to recognize other standards in the Family as equivalent.

OUR POSITIONS

'IFOAM - Organics International' has developed positions on a range of topics. These include: Use of Nanotechnologies and Nanomaterials in Organic Agriculture; The use of Organic Seed and Plant Propagation in Organic; The Role of Smallholders in Organic Agriculture; The Full Diversity of Organic Agriculture; The Role of Organic Agriculture in Mitigating Climate Change; Smallholder Group Certification for Organic Production and Processing; Position on Genetic Engineering and Genetically Modified Organisms; Organic Agriculture and Food Security; Organic Agriculture and Biodiversity.

OUR POLICY BRIEFS

'IFOAM - Organics International' has policy briefs on 'How Governments Can Regulate Imports of Organic Products Based on the Concepts of Harmonization and Equivalence' and 'How Governments Can Support Participatory Guarantee Systems (PGS)'.

OUR BEST PRACTICE GUIDELINE FOR AGRICULTURE AND VALUE CHAIN

These guidelines describe the visions and objectives of organic practices in production, processing and trade.

DIRECTION

Managing 'IFOAM - Organics International'

Direction assures good governance of the global organic umbrella network including the institution of 'IFOAM - Organics International' and its Global Action Network (which includes all our Self-organized Structures). The General Assembly (which operates via virtual votes or face-to-face assemblies) and the World Board are the democratically legitimized bodies that link the movement to the Task Forces and the Executive Office. The regional offices for Africa, Latin America and North America facilitate the linkages.

UMBRELLA

Uniting the Organic Movement.

The 'Organic Umbrella' is a term coined in our 2009 strategic revision to define the work carried out by this department. Areas of activity that fall under the 'Umbrella' are membership communication, 'IFOAM - Organics International' events organization, the Organic World Congress, publications, our website and the Organic Info Hub, media relations, sponsorships and brand marketing.

To explore opportunities of cooperation in any of the above areas, please contact us or browse our website [HERE](#) for more information.

VALUE CHAIN

Facilitating Production and Trade.

The Value Chain department represents the work of 'IFOAM - Organics International' to support organic standards and verification systems, including primarily the following components: The IFOAM Organic Guarantee System, composed of several services for organic standard owners, certification bodies and operators; the promotion of Harmonization and Equivalence among organic standards and regulations; the global coordination and support of Participatory Guarantee Systems, an alternative to third party certification; the IFOAM Best Practice Program, which promotes best practices in the organic value chain. ADVOCACY

Promoting Sustainability in Agriculture.

IFOAM advocates for agricultural policies based on the principles of organic agriculture. IFOAM is active in all the key food/ agriculture related international policy processes and is the only global agricultural organization that puts the wellbeing of people and ecosystems at the heart of its policies and actions.

IFOAM's core advocacy campaigns take a holistic approach by raising awareness of the organic alternative, advocating for change in policies. For more information, click [HERE](#).

PROGRAMS

Assisting Organic Development.

International projects of 'IFOAM - Organics International' are implemented in close cooperation with regional membership and other stakeholders, involving local human resources and emphasizing participatory and ownership building processes.

Counting on a wide network of skilled experts and consultants, providing access to information and knowledge, we contribute with project planning, project steering, consultation and evaluation. To find out more about our projects, click [HERE](#).

ACADEMY

Assisting Organic Development.

The IFOAM Academy was launched with the express aim to provide capacity-building training programs for the global organic movement. It aims to support skills development capacity in the global movement, by integrating and developing training programs that are relevant, needs-based and effective.

Our flagship program is the Organic Leadership Training Course, taking place in regions across the globe - growing networks, building capacity and developing skills in the sector where it matters. For more information, click [HERE](#).

THE IFOAM NETWORK

SELF-ORGANIZED STRUCTURES

If you would like to find out more about IFOAM

AgriBioMediterraneo, please contact: Floriana Di Cintio, f.dicintio@libero.it

IFOAM AgriBioMediterraneo (ABM) was established as a regional initiative in Vignola, Italy, 1990. It became an official IFOAM Regional Group in 1997. AgriBioMediterraneo includes 146 'IFOAM - Organics International' Affiliates from three continents and 16 Mediterranean countries: Albania, Bosnia-Herzegovina, Croatia, Cyprus, Egypt, France, Greece, Israel, Italy, Palestine, Portugal, Serbia & Montenegro, Slovenia, Spain, Tunisia and Turkey.

It spearheads initiatives specifically targeted towards Mediterranean Organic Agriculture issues and has founded four working groups on the following topics of marketing, research and development, standards and certification as well as training.

Special emphasis is given to the development of organic olive culture, viticulture, citrus and Mediterranean fruits, arable crops and livestock, as well as development of local markets, regional standards and AgriBioTourism.

If you would like to find out more about the IFOAM Amenity Agriculture Alliance please contact:

Mr. Liu Qingdong, organicseed@vip.sina.com; president@iaaa.ifoam.org

Ms. Amanda Song, beabseed@sina.com; info@iaaa.ifoam.org

On April 17th, 2012, **IFOAM Amenity Agriculture Alliance (IAAA)** was created by an initiative supported by IFOAM members from China, Germany, Italy, Spain, United States and Japan. The IAAA Council is made up of official agencies and a number of committees including an intercontinental committee, project committees, establishment committees as well as designated individuals.

The IAAA aims to promote the development of organic agriculture, the amenity industry and amenity agriculture globally. It also plans to set up the 'IFOAM - Organics International' accredited organic agriculture and amenity agriculture certification body in China, which will then seek accreditation in other countries. It intends to establish intercontinental and regional chapters in North America, the Middle East, and Southeast Asia.

The IAAA will unite global agriculture technologies and help developing countries to expand their agricultural sector. The IAAA has set up a fund to invest to global agriculture.

SELF-ORGANIZED STRUCTURES

If you would like to find out more about IFOAM Animal Husbandry Alliance, please contact: iaha@ifoam.org or visit their website where you can also download IAHA newsletters.

IFOAM Animal Husbandry Alliance (IAHA) is an informal network of persons/groups interested in supporting, strengthening and stimulating the development of organic animal husbandry around the world. It focuses on animal husbandry and facilitates the integration of organic animal husbandry knowledge, concerns, positions, and issues into the work of IFOAM and the Organic movement.

The IAHA provides input for the norm development and position papers of 'IFOAM - Organics International', as well as for national organizations, certification bodies, research institutions, communicators and policy setters. It contributes to the advocacy work of 'IFOAM - Organics International' for organic livestock and livestock keepers and facilitates learning for national organic sectors and those that want to progress in animal husbandry development.

[Link to website.](#)

*If you would like to find out more about the IFOAM Aquaculture Group please contact:
Deborah Brister, Coordinator,
deb.brister@gmail.com*

The IFOAM Aquaculture Group is a Self-organized Structure for members interested in organic aquaculture. Its purpose is to pursue IFOAM's objectives within the area of aquaculture and captured fisheries and to represent its members both in and beyond 'IFOAM - Organics International' .

Furthermore, the IFOAM Aquaculture Group facilitates interaction among its members and contributes to discussions on standards, certification and also promotes the further development of aquaculture and captured fisheries.

[Link to website.](#)

SELF-ORGANIZED STRUCTURES

Please contact the IFOAM Asia Secretariat for more information on membership or participation in projects and events:

Jennifer Chang
(Executive Director)

jchang2011@gmail.com
ifoam.asia@gmail.com

Since the official launch on June 28th, 2013, **IFOAM Asia** has focused on building its membership base and on work areas such as the promotion of bio-villages, short-value chains like the Korean coop and the Japanese teikei models, Participatory Guarantee Systems (PGS) and Community-Supported Agriculture (CSA).

At the end of 2014, there were 101 members in IFOAM Asia including organic movements and NGOs in 16 countries.

IFOAM Asia initiated the project of building an association of Asian local governments to promote organic agriculture especially using the bio-village model as a more comprehensive form of organic agriculture development. The project links governments and organic NGOs in developing policies, and support measures to increase farmers' livelihoods, sustainable agriculture and rural community development. MOUs have been signed among the local governments in South Korea, Philippines and India. More MOUs are planned among the local governments in other Asian countries before the official launch of the association in September 2015. Interested local governments and organic groups can contact IFOAM Asia to collaborate in the project.

Slow but steady progress has been made in promoting short-value chains with IFOAM Asia nominees to the One World Award, Timbaktu Collective of India and Hansalim Federation of South Korea named as the joint Gold Winners. PGS training in Bangladesh resulted in the formation of the Bangladesh PGS Council. More PGS-related projects will be undertaken in Indonesia and the Philippines.

In 2015, IFOAM Asia will also work hand-in-hand with the 2015 ISOFAR Goesan International Organic Expo Committee in organizing international organic conferences and in bringing foreign traders, buyers, farmers and consumers to the event.

SELF-ORGANIZED STRUCTURES

IFOAM INTER-CONTINENTAL NETWORK OF ORGANIC FARMERS ORGANISATIONS (INOFO)

INOFO is not a new organisation, it is a new relationship between existing Organic farmers unions.

Convenorships now exist in most regions. Where this is not evident, please see

<www.ifoam.org/inofo> or write to INOFO Council's external contact c/o

FNAB (France):

<[apinschof@fnab.org](mailto:apinschhof@fnab.org)>

Intercontinental Network of Organic Farmers Organisations

*Réseau Intercontinental des Organisations de Paysans Biologistes
Red Intercontinental de Organizaciones de Productores Ecológicos*

Efforts made by organic farmers' organisations over many years to set up their own professional union began to take root at their assemblies in Italy 2008 and Korea 2011. They now have their autonomous self-organized structure in which their organisations can consult & cooperate on matters of common concern and, when necessary, speak in any forum with a legitimate professional voice, whether or not they are affiliated to 'IFOAM - Organics International'.

Initial objectives were limited to setting up an infra-structure of Delegates & Convenors mandated from the grass roots upwards, by which farmers organisations keep in touch with each other at national & regional levels and, when necessary, at intercontinental level. Once every 3 years, local organisations can send delegates to the **INOFO** General Assembly (always same place as IFOAM GA). Last INOFO GA was in Istanbul, Sunday 12 Oct 2014, next one in India 2017. The Assembly renews the Council of Convenors and initiates the thematic working groups that will operate for the following three years. Spokespersons will be mandated by the INOFO Council for various forums at regional or international level or for each new situation that arises.

If you would like to find out more about IFOAM EU Group, please contact:

info@ifoam-eu.org

As the European umbrella organization for organic in Europe, **IFOAM EU** advocates for the development and integrity of European organic food and farming. We fight for the adoption of ecologically, socially and economically sound systems based on the IFOAM principles of organic agriculture – health, ecology, fairness and care. With more than 160 member organizations our work spans the entire organic food chain and beyond: from farmers and processors, retailers, certifiers, consultants, traders and researchers to environmental and consumer advocacy bodies in the European Union, European Free Trade Area and Candidate countries.

SELF-ORGANIZED STRUCTURES

If you would like to find out more about IFOAM Euro-Asia, please contact:

Saparbek Alymkulov,
Coordinator,

info@euro-asia.ifoam.org

IFOAM Euro-Asia, set up in 2014 is the regional alliance of the Euro-Asian organic movements aimed at assuring the organic food and farming in their respective states. Our main goal is to create a single organic market in the Euro-Asian region.

Objectives:

- To make the principles of organic farming regulating the agrarian sector provisioned in the educational system;
- To build strong organic management responding to recent environmental and food security challenges by strengthening capacity of organic leaders;
- To develop and adopt a set of harmonized organic standards adaptable to all member countries;
- To promote the alliance's organic development interests at regional and international levels;
- Introduce and implement joint organic regional projects and programs;
- Conduct training and exchange of experience for national trainers;
- Training for national certification agencies and helping to develop national certification bodies;
- Assistance in the preparation of national legislation;
- Assist in conducting research for all stages of organic production.

[Link to website.](#)

If you would like to find out more about IFOAM France please contact:

asafi@ifoam.org or
president@france.ifoam.org

IFOAM France became a Self-organized Structure in 2012 representing 'IFOAM - Organics International' affiliates in France ranging from producers, processors, regional umbrella organizations members, researchers, trainers, certification bodies, organic trademarks owners to consumers. It is a platform for exchange on organic production, processing, control measures, between national and international levels and ensures representation of French Affiliates inside IFOAM and it's constituted groups as well as in international meetings of the organic movement. It carries out a number of activities in the fields of organic production, processing, control measures and defends its interests and those of its members.

SELF-ORGANIZED STRUCTURES

If you would like more information, please contact

Dr. M. Reza Ardakani,
Director.

mreza.ardakani@gmail.com

IFOAM IRAN was established on 11 May 2014 with the **objectives** of:

- Pursuing IFOAM's objectives among governmental and non-governmental organizations in Iran;
- Representing its members within 'IFOAM - Organics International';
- Representing its members to the beyond 'IFOAM - Organics International';
- Carrying out capacity building and extension activities on a national level in cooperation with the international organic movement;
- Providing regional and local training programs for organic activists, based on 'IFOAM - Organics International' guidelines;
- Building an international relationship between Iranian activists and international organic activists;
- Developing organic standards and regulations based on IFOAM norms;
- Accelerating the organic movement not only in Iran, but also in the region.

If you would like to find out more about IFOAM Japan please contact:

organic@ifoam-japan.net

Established in 2001, **IFOAM JAPAN** aims to boost awareness of domestic organic farming activities among consumers, producers, manufacturers, distributors, and advise policy-makers. The Self-organized Structure provides opportunities for its members to exchange knowledge, information, experience and skills, and also represents members' voices at governmental assemblies and/or policy meetings on both national and international soil. IFOAM Japan is also active in facilitating the harmonization of standards and policies in Japan and its neighboring countries and provides seminars on organic farming development.

SELF-ORGANIZED STRUCTURES

If you would like to find out more about IFOAM Latin America, please contact:

info@latinamerica.ifoam.org

IFOAM Latin America

Since its founding in 2006, GALCI, which became **IFOAM Latin America** in 2012, has had an active institutional life, facilitating close cooperation among countries in Latin America and the Caribbean. IFOAM Latin America represents organizations ('IFOAM - Organics International' affiliates) such as producer associations, traders, certifiers, NGOs and individuals from Latin America and the Caribbean.

It collaborates with INOFO, the Intercontinental Network of Organic Farmers Organizations and other networks like SOCLA.

The regional agenda is now focused on advocating issues relating to Organic Agriculture and Agroecology linked to family agriculture showing benefits for climate adaptation, food security, biodiversity and domestic market, mainly. Its activities are based on the development of influential proposals for public and private stakeholders as well as for the global organic movement based on the Latin American and Caribbean reality.

[Link to website.](#)

If you would like to find out more about IFOAM Southern African Network, please contact:

info@isan.ifoam.org

ISAN - IFOAM Southern African Network

It has been planned for a long time to improve the exchange and coordination within the Southern African Organic Sector by establishing a specific platform for development and growth. During the 2nd African Organic Conference, Zambia, the founding meeting of ISAN was held on 6 May 2012. A follow-up meeting was held on 8 March 2013, Gauteng, South Africa.

Our Objective:

Develop the Organic Agro-Ecological sector in Southern Africa.

Our Priorities:

- Raise consumer awareness;
- Address policy issues;
- Expand participatory approaches;
- Set up three evidence-based comparative systems trials in Southern Africa;
- Improve information access and efficiency.

tipi@foam.org

The Technology Innovation Platform of IFOAM (TIPI) was founded on February 15, 2013 in Nuremberg, Germany. TIPI's mission is to foster international collaboration in organic agriculture research; engage and involve all stakeholders that benefit from organic agriculture research; facilitate exchange of scientific knowledge of organic food and farming systems; and to help practitioners disseminate, apply and implement innovations and scientific knowledge consistent with the principles of organic agriculture. It is developing a global vision and research strategy for organic farming and organizes annually the Science Day at BIOFACH, the world organic trade fair.

DAUGHTER ORGANIZATION

For more information on our current and new areas of work, please contact:

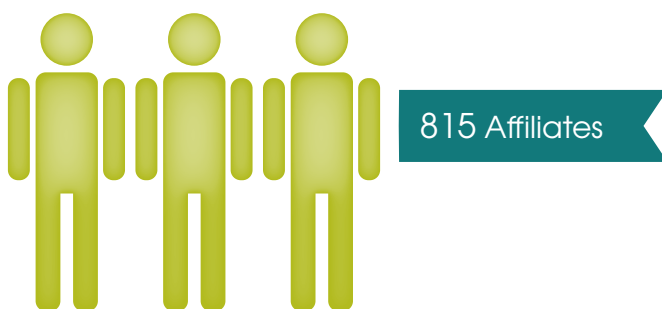

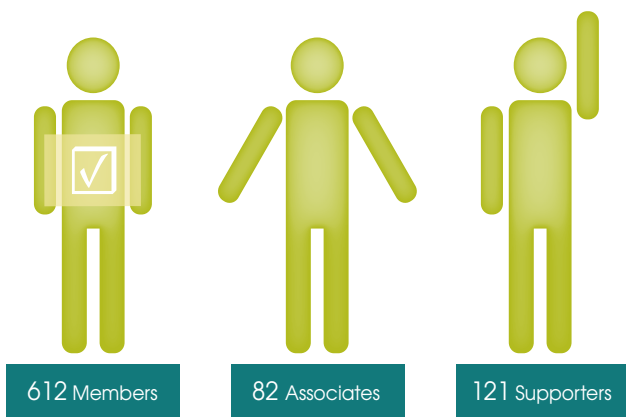

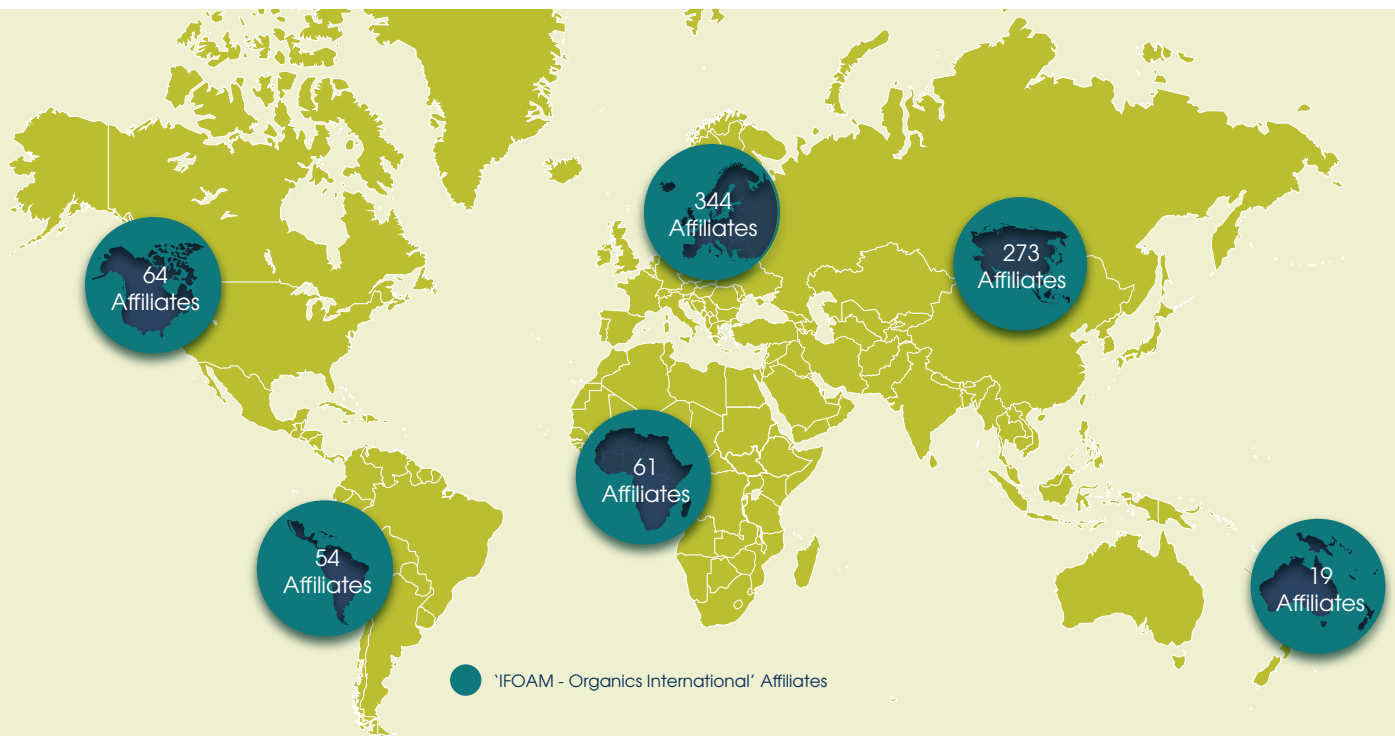

info@ioas.org or visit
www.ioas.org

IOAS is an independent non-profit organisation that works on behalf of organic and sustainable agriculture to ensure trust and fair trade in certified products for producers and consumers.

Our main activity is to verify the competence of certification bodies active in organic and sustainable agriculture. We work globally, focusing our work solely in this field and apply our unparalleled experience with commitment and enthusiasm. We work with private scheme owners like 'IFOAM - Organics International' and others such as the Sustainable Agriculture Network and the Global Organic Textiles Standard and with regulators (such as the Canadian government) to assist in the development of sustainable production systems by building trust in certification worldwide. Our direct clients are the certification or control bodies throughout the world that inspect farms, processors and traders

[Link to website.](#)

OUR AFFILIATES

MEMBERS are organizations that are predominantly organic, i.e. dedicate over 50% of its budget/activities to organic and have voting rights at the General Assembly.

ASSOCIATES dedicate less than 50% of their budgets to organic and have the same rights as the members *with the exception of* voting at the General Assembly.

SUPPORTERS are individuals who support 'IFOAM - Organics International.'

Laguna Blanca is an agricultural project molding historical farming techniques with modern ideas, shaping a new model in order to match food production with biodiversity care. Grasses, cereals, herbs, vegetables, orchards, woodland, and livestock (sheep and laying hens) are among many of the agriculture products at Laguna Blanca. Additionally, nutrient management is accomplished through the production of thermophilic compost, vermicompost, compost teas and extracts, and a well planned crop rotation system that incorporates abiotic and biotic factors such as soil profile and type, time of year, plant type, and root depth.

GABA is the primary organization in Azerbaijan promoting organic agriculture. Since its creation in 2000, more than 2000 farmers have been trained in organic agricultural methods and 332 have advanced to the stage of applying for organic certification of their products. GABA initiates multiple organic agriculture projects, including the study of Organic Agriculture Management at the Azerbaijan State Agrarian University, and the establishment of the organic certification body AZEKOSERT and soil laboratory. GABA is Azerbaijan's first NGO to pursue this quality management system. On August 13, 2010, GABA was notified that the Swiss certification body SGS had certified GABA under ISO 9001-2008 system of certification.

ANC - Associação de Agricultura Natural de Campinas e Região (Natural Farming Association of Campinas and region) - is a non-governmental, non-profit organization. Concerned about the abuses and attacks on our ecosystem, since 1991, ANC has been promoting and actively participating in environmental events in the region of Campinas - SP, Brazil. The main activity of ANC is organic certification for food produced and processed within the rules that ensure consumers, concerned with quality of life, healthier and more nutritious products, promoting sustainable agriculture and the protection of the environment. In this sense, the ANC has supported and encouraged fairs for organic products wherever possible to find a great variety of seasonable fruits and vegetables, grown without the use of chemical inputs, and also bread, jams and dairy products processed with organic raw materials, straight from the producer to the consumer, guaranteed by ANC.

Demonstrative area: Currently it keeps a productive area of vegetables, medicinal plants research. During the last years some research has been carried out including a Master of Science thesis and Doctorate in biodynamic preparations. As a basic tool in biodynamic agriculture, the Association produces biodynamic preparations. It publishes the annual Agricultural Astronomical Calendar and the Magazine Biodynamic Agriculture Demeter standards. The Biodynamic Association is responsible for the elaboration of the production standards of Demeter label. In advisory, we prioritize groups of small holder farmers. We have developed innumerable projects, acting in diverse Brazilian ecosystems and support the commercialization of biodynamic products. In 2011, we were recognized officially as a PGS. We organize a biodynamic seed network.

The Welfare Institute is an NGO formed by a multidisciplinary group of people. It aims to promote quality of life for humans, animals and the planet, through actions related to ecology, sustainability and social justice. It has partnerships with schools, universities, NGOs and government organizations. It develops actions related to environment education, for the development of organic production (mainly in the animal area) and through art therapy for people in physical and mental fragility.

Organics Brazil is the brand name of a sectorial program developed by a public private partnership headed by IPD - Development Promotion Institute - and Apex-Brasil - Brazilian Trade and Investment Promotion Agency - that is supporting and marketing organic and sustainable producers and local enterprises from all biomes of Brazil: Amazon, Cerrado, Caatinga, Atlantic Forest, Pantanal and Pampa. Being organic, environmental sustainable and with good patterns of quality are pre conditions for the producers in this program, but what really matters from a trade perspective is also that the products you can find here are made with the biomes characteristic.

The Cambodian Organic Agriculture Association (CORAA) is a business association working for the promotion of organic agriculture in Cambodia. Its membership is comprised of farmers' cooperatives and associations, NGOs, small enterprises as well as several individuals. CORAA is registered with the Ministry of Commerce. CORAA believes that an increased production and consumption of organic foods contributes to healthier people, a healthier environment and poverty reduction. The association aims to be Cambodia's leader in defining organic standards, providing certification and increasing demand for organic foods.

The Certified Organic Associations of British Columbia (COABC) is an umbrella association representing organic certifying agencies in the province. COABC is empowered by the British Columbia Organic Agricultural Products Regulation under the British Columbia Food Choice and Disclosure Act to implement an organic certification accreditation province-wide. COABC was incorporated under the Society's Act in March of 1993. The certification accreditation program is an industry and government partnership program which is industry - driven and industry - regulated, with government providing oversight authority. The main objectives of the program are to provide consumer confidence in organic product certification, to assist producers increase market share, and to support the regional development of organic food production, processing and marketing.

The name Lohao stands for "Lifestyle of Health and Organic" It embodies, and is synonymous with, a healthy and organic approach to life. LohaoCity is a specialty shop selling a wide range of organic health foods and other natural products. While the majority of China's farmers still adhere to the belief that chemical fertilizers and pesticides are necessary for crop production, many Chinese have already begun to seek and demand organic healthy foods. LohaoCity was founded with the purpose of responding to this growing need. Established by a group of people who love nature and are advocates of a health-conscious lifestyle, the LohaoCity Organic Health Store aims to connect consumers with finest organics and top-quality health foods. While delivering wholesome and delicious foods, we are also making unremitting efforts to protect and preserve our beautiful planets. Milestones in 2002: The Zhiwan Organic Ranch was established in Beijing's Miyun County, covering an area of 22,000 acres.

BNS Biocyclic Network Services is the central administrative unit that represents and coordinates the activities of the members of BIOCYCLIC NETWORK (group of about 100 certified organic producers that work according to Biocyclic Standards) and the ORGANIC MARKETING & EXPORT NETWORK - O.M.E.N. (group of 6 organic pack houses, 2 vineries and 1 institution involved in organic inputs and research on Biocyclic production methods). BNS grants marketing support to more than 800 organic operations in Greece and Cyprus and has implemented Biocyclic Standards certified by bio.inspecta and Naturland.

Ekovin's goal will be for the future promotion of modern technology especially friendly to the environment. Mastering integrated production technology is the gateway to a successful transition to a purely ecological system, as evidenced by the ever growing area biovinic registered. Currently, there are approximately 12,000 hectares of vineyards in the integrated production which represents approximately 63% of all vineyards in the Czech Republic with the growing interest in environmentally friendly agriculture is expected in 2009, an increase of about biovinic area 400 hectares, the vast majority of the transition from the areas of integrated production.

The Czech Technology Platform for Organic Agriculture (CTPOA) was founded with the aim of uniting and linking a wide range of people and companies active in the field of organic farming and organic food production. The platform was founded in accordance with the European initiative of TP Organics. The CTPOA incorporates research institutes, universities, business representatives in the Czech Republic, both primary producers and processors of organic produce. All members have bound themselves to support initiative focused on strengthening competitiveness of organic agriculture and the development of production, distribution, sales and consumption of organic food, to be active in the related areas of scientific research, technology and innovation and to support and actively participate in the creation and implementation of strategic documents.

CEDAP is a non profit organization founded in 1995 in the Democratic Republic of Congo as a civil society association. It aims to contribute to socio-economic development including promoting organic agriculture and practices and gender equality within the eastern DRC areas. Its mission is to help farmers and grassroots communities to become drivers of their own development by lifting themselves out of poverty through bio-agriculture and participatory projects.

ICROFS: International Centre for Research in Organic Food Systems The International Centre for Research in Organic Food Systems (ICROFS) was founded in 2008. The centre is an expansion of the former Danish Agricultural Research Centre for Organic Farming (DARCOF), which the Danish Government gave an international mandate and an international board consisting of research leaders and stakeholders from Asia, Africa, USA, Europe and Denmark. The main purpose of ICROFS is to provide research results that may contribute to the promotion of organic food systems, including agriculture, aquaculture, processing and consumption of organic food. The vision of ICROFS or the 'Big Hairy Audacious Goal (BHAG)' is that 'organic principles will become the global norm for sustainability in farming and food systems due to evidence based on research and innovation'.

Organic Denmark (Økologisk Landsforening) is the leading organic food cluster in Denmark. Our members are organic farmers, food companies with organic products and consumers in Denmark. With 150 member companies, we represent essentially the entire organic food industry in Denmark. In this way, we are a major force in the domestic market as well as in national and international politics. We have been paving the way for organics for more than 20 years and we are proud that Denmark is the world's leading organic nation with an organic share of 8% and a national goal of 60% organic in all public kitchens. Similarly, to our role in the Danish market, we also promote Danish organic products at an international level for example by bringing together international supermarket chains and producers of Danish organics. As a result, the export of Danish organics has grown by 12%.

Tel: +202 2656 4124

Fax: +202 2656 4123

www.sekem.com

SEKEM is the first initiative to develop biodynamic farming methods in Egypt, building up fertile soil structures, improving agro-biodiversity and promoting organic composting; all products of the system can be sold, used in processing or re-used in cultivation. SEKEM's commitment to innovative development led to the nationwide application of biodynamic methods to control pests and improve crop yields. For example, in collaboration with the Egyptian Ministry of Agriculture, SEKEM deployed a new system of plant protection for cotton, reducing total pesticide intake to less than 10% and leading to a ban on crop dusting in the country. SEKEM has grown in the last decade to become a nationally renowned enterprise and market leader in organic consumer goods. Apart from strong and long-lasting export partnerships in Europe and the US, today, more than half of SEKEM's overall sales are domestic within Egypt, making the country home to one of the largest markets of organic products.

Initiative Bio Bretagne is a regional umbrella organization of the organic sector in Brittany (France). It was created in 1995 and brings together 6 groups: organizations of organic producers, suppliers of goods (animal feeds, inputs, material, etc.), processors, distributors, service providers (training, research, technical advice), associations of consumers. Inter Bio Bretagne is a place of exchange, dialogue and representation in which the professionals of the organic sector become active in the fields of organic regulations, structuring organic sectors, research, communication and catering.

Eden Parc is an agro-ecological orchard park created in 1986 on Huahine (island near Tahiti). The founder has been organically farming since 1978 and has travelled all over and stayed in most of the tropical countries. Eden Parc has become one of the most visited places in French Polynesia. The productive impact of its organic certification in 2002 now sees the founder in external demand for organic development as a consultant and trainer on subtropics. His diplomas and organic experience have confirmed his position. He is also Board Member in POET Com, the Pacific Organic organization. He is also manager of the Pacific agency for the international certification body BioAgriCert, recently active in the whole Pacific according to the Pacific Organic Standard and other main standards.

BCS ÖKO-GARANTIE GMBH is licenced as a private controlling agency since May 11th 1992 to implement the EU Regulation on organic production. We are one of the first control bodies in Germany. Long standing experience and personal engagement in all areas of organic production are the reliable basis of BCS. Our central office is in Nürnberg/Germany. We are represented in all continents with a number of offices and representations. BCS ÖKO-GARANTIE currently employs more than 100 experts for inspections and certification of production, processing and trade according to a number of standards. If requested, BCS ÖKO-GARANTIE also supervises and evaluates contract conditions, guidelines, and licence payments for different organisations and trade mark holders. BCS ÖKO-GARANTIE offers a seal for BCS certified companies, in order to help them distinguish their products in the market. The BCS seal is an easily recognizable sign for the customer to identify high quality organic products

Schrot&Korn – the monthly customer magazine for the natural food trade. Over 2,800 organic retailers (organic stores, organic supermarkets, farm shops, organic bakeries and health stores) distribute about 700,000 magazines monthly. Schrot & Korn draws a clear distinction between organic in conventional stores and natural foods, and provides good reasons on why to buy in specialty stores. Attractive recipe series, product information, and product presentations all provide readers information on organic groceries. The section “Well-being” looks, in particular, at health and wellness, offers useful tips and shows the advantages of natural cosmetics. “Meeting Place” provides information on natural foods and natural products with examples from companies and interviews with well-known personalities. Every month the section “Perspectives” offers a variety of information on organic cultivation, health, fashion, politics, environment, travel, building, living and mobility.

The Faculty of Organic Agricultural Sciences is a part of the University of Kassel in Germany that has been teaching and conducting research on Organic Agriculture since 1995. Our aim is the preservation and improvement of nutritional resources and livelihoods in general. Taking into account these priorities, research and teaching are based on the precautionary principle in terms of contents and methods. More than 1000 students are enrolled in the following programs: Bachelor and Master "Ökologische Landwirtschaft" (taught in German) as well as the international master programs "Sustainable International Agriculture" and "International Food Business and Consumer Studies" (taught in English). Research in collaboration with (inter)national partners takes place in modern and well equipped laboratories as well as on our 340 ha organic teaching and research farm, which produces eggs and dairy products and a wide range of arable crops. The farm also houses a tropical greenhouse with 400 agricultural plants from the subtropics and tropics.

Out of an environmental movement Gäa e.V., association of organic farming, was founded in Dresden in 1988. Gäa became the first East German organic farmers organization. The main objective is to provide information and guidance to farmers, gardeners and processors for the conversion process to organic principles. Lobbying and capacity-building in the field of the organic sector are its main objectives. Gäa has developed own standards and started inspection and certification activities in 1991. A delegation of Gäa-representatives from the former German Democratic Republic attended the first IFOAM meeting for East European countries in Tarnow, Poland in 1989. In 1990 Gäa became a member of IFOAM within the East European group. Gäa has been accredited in the IFOAM accreditation program since 2004. In 2005, Gäa was approved by Bio Suisse.

The Department of Organic Agriculture (GFO) is part of Kiel University in Germany. GFO carries out research in the fields of low-input and organic farming with special emphasis on N and energy use efficiency of different crops and farming systems. Other research areas are legume N₂ fixation, nitrate leaching and GHG-emissions from agricultural crops. GFO conducts organic long-term experiments containing different farming systems and permanent grassland. GFO cooperates intensively with a network of organic farms of different farm types to verify findings from small plot experiments. GFO is in charge for the fully organic certified research farm Lindhof which produces beef, pork and arable crops.

Agro Eco-Louis Bolk Institute is an advisory and research organisation advising in the field of organic agriculture and related areas. It works with, and strengthens links between all aspects of the organic chain: farmers, processors, traders and consumers. Our advisors provide a package of services for primary production, processing and marketing, world-wide. We help the private sector, NGOs, governments and international organisations in the development of niche markets for quality products, notably certified organic, Fairtrade and Rainforest Alliance products that often involve large groups of smallholder farmers.

The Attiki Association of Organic Farmers Markets was founded in 2002. Its aim is the establishment and operation of organic farmers markets where producers may sell their products directly to the consumers. We operate markets in twenty two municipalities in Attiki serving more than ten thousand consumers. At the time being the association numbers more than one hundred and twenty organic farmers from all over Greece. In our markets we only have organic farmers participate, selling their own organic certified produce such as fresh fruits and vegetables, eggs, olive oil, wine, processed goods and herbs.

Produce Green Foundation is a Hong Kong based non-profit charitable organization. In 1989, we set up Hong Kong's first educational organic farm in a valley in the countryside. In 2003, we established a community garden in the city. Through activities organized in the two sites, we promote organic farming and green living to the public while nurturing people for local organic agriculture. From 2002, we have been involved in setting up a local certification body to build trust between consumers and producers.

IIRD was established in 1987 and is based in the Marathwada region of Maharashtra in central India. IIRD is the recipient of the Sustainable Agriculture and Rural Development (SARD) Award. The organization has pioneered several initiatives for the inclusion of small and marginal farmers in accessing guaranteed organic markets. The local or Participatory Guarantee Systems (PGS) and Organic Bazaars are among the key initiatives that have enabled thousands of small and marginal organic farmers in India to sell their organic produce.

The Organic Farming Association of India or OFAI is a farmer-led, gender mainstreamed organization that mandates its President should always be an organic farmer [of either gender]; that one-third of its Managing Committee should be women and that half of the MC be organic farmers. The remaining members can be scientists, administrators, organic farming promoters and others nominated/elected by the different states of the Indian union at 3 per state with one of them necessarily being a woman. The main activities of OFAI are advocacy, documentation, networking, capacity building and empowerment of farmers through farmer-to-farmer and scientist-to-farmer transfer of knowledge and skills as well as exchange of innovations and seed materials. OFAI is a leader in the promotion of PGS. It has published PGS manuals in 8 Indian languages and made them freely available to other NGOs and to Federal and State Government agencies for adoption.

Phalada Agro Research Foundation Pvt Ltd is a company dedicated to producing high quality organic products for the international market. We pride ourselves in providing end-to-end solutions for organic agriculture in India and are involved in each stage of the supply chain, from production of compost to the export of processed herbs, spices and other food commodities. Phalada was founded in 1999 to develop inputs for organic farmers to help improve soil fertility and prevent pests and diseases. This soon led to a more committed involvement to facilitate organic certification of farmer's groups and provide them with a premium market. Today we are a leading company in the organic sector in India, producing a wide range of products in our GMP certified processing facility in Bangalore in South India. Being involved at each stage of the supply chain means that we are able to customise our production according to your requirements, from planting material through to retail packing.

The Stockton Group (Stockton) specializes in the development and marketing of plant extract based bio-pesticides. Its core focus is on their integration alongside conventional chemical products into conventional agriculture spraying programs and creating a balanced, cleaner and healthier agricultural environment. Stockton has an active R&D program for the development of future natural products for crop protection. In this area, the Group has a unique research and development center in Israel and invests substantial resources in developing "green" products. Stockton has a variety of products adapted to regional needs, biological parameters and regulatory guidelines, and is active in more than 35 countries worldwide. Stockton's flagship product Timorex Gold® is used to control a broad spectrum of crop diseases. Stockton is an international company established in 1994 as a privately-owned company and has a staff of 40 employees in Israel, and around 120 employees worldwide. The company has offices in 20 countries and operates in about 40 countries.

www.aiab.it

The Italian Association for Organic Agriculture (AIAB) was initiated in 1982 and officially established in 1988. It unites several member types (farmers, processors, extension experts, researchers and consumers) in all Italian Regions. AIAB promotes organic farming as a model for rural development through member tutorship, policy orientation at Regional, national and EU level, education, publishing, promotion, extension and research. It is organized by regional chapters (18) coordinated by a federal structure based in Rome. AIAB staff participate in Ministerial committees on organic farming and IFOAM committees. In 2007 AIAB founded FIRAB (Italian Foundation for the Research in Organic Farming).

www.aiabcalabria.it

AIAB Calabria is an association of social promotion composed of producers, consumers and technicians who work in organic farming, understood not only as a pure method of agricultural management, but as a means of promotion, protection and development of the territory. Therefore AIAB Calabria promotes organic farming as a method of developing the Italian countryside, as an alternative to industrial and intensive agriculture, able to produce quality food in an environmentally friendly way.

ICEA is a stakeholder owned certification organization, with over 13000 certified firms with strong ethical, environmental and social values; employing about 300 technical staff and operating 23 operation centres in Italy and abroad, and is one of the top certification bodies in Italy and in Europe. Icea is operating all over the world directly or with local partnerships. Organic agriculture certification (EU, JAS, NOP, COR etc) is the main activity, other certification schemes developed are: sustainable fisheries, textiles, detergents and cosmetics, ecological architecture and building materials, bio wellness, ecotourism, ethical trade, social accountability. Icea is also active in Climate Change, a founding and participating member of the Round Table of Organic Agriculture and Climate Change. International cooperation for development is another relevant sector of ICEA activity.

JOAM was formed in 2001 with the mission to facilitate the development of a sustainable and economically viable organic agriculture sector in Jamaica. We are a non-governmental organisation run by volunteers. Since its inception, JOAM has run a number of training programmes for farmers. It has hosted three IOIA basic crop production inspector trainings and has a cadre of inspectors. JOAM operates through grant funding and membership payments. It provides training and support to members of the organic movement and interested farmers. It has assisted in the development of 8 demo farms so that training and information sites for farmers are more accessible.

MOAM aims to be a dynamic movement in safeguarding the well-being of the rural development by sustainable farming methods. Moreover, the NGO acts as a pressure group to promote organic production, protects and forbids cruelty to animals, opposes GMOs and, in coordination with other environmental bodies and NGOs, works towards quality environment enrichment. Malta Organic Agriculture Movement (MOAM) is a totally independent and voluntary organisation set up in November 1999 to promote Organic Agriculture in Malta. Its members include farmers, consumers, technical people and many others who have the local natural environment at heart. The primary aim of MOAM is to inform the public about Organic Agriculture, share and disseminate ideas and methods for Organic Agriculture, organise the necessary training, represent those who embrace organic principles both locally (in parliamentary circles, administration and policy making) as well as internationally.

We have Cow-Calf operation with Angus and Brangus Cattle, in two Ranches (1,200) (300) with 1,500 cows free in organic grass lands. After milking for 6 to 7 months (240 kg) the calf is separated from the cow and goes to the grass land to grow to 300 kilos, when it is ready for the Organic Feed Lot where the pen, shade and in general the best conditions for animals are 100% Organic Rationing. We are working with high genetic "tenderness" in our cattle.

As the one of the earliest manufacturers of organic foliar fertilizer in Myanmar, the company has shown its commitment to creating not only a marketable product but also one which is environmentally harmless. 'A society which is both wealthy and healthy creates prosperity', this is the belief of Shan Maw Myae Co., Ltd. Both chemical fertilizers and natural fertilizers are important for the production of crops. Shan Maw Myae Co., Ltd organizes and develops the substitution of natural fertilizer for chemical fertilizer in organic farms.

We support rural communities in forming a more sustainable society. With our projects we empower local farmers and their organisations with new knowledge and techniques about organic agriculture and agri-environment. We achieve our aims by: 1. Developing agro-environmental policy programmes; 2. Advising on organic production, market & chain development; 3. Setting up demonstration farms; 4. Training local trainers; 5. Publishing guides and other communication materials. We strongly believe in connecting people and therefore created our informal Avalon Network (www.avalon.nl).

The Centre for Organic Agriculture (CBL) was initiated by the Association for Organic Agriculture in Flevoland. Its objective is to promote organic agriculture. By stimulating the transfer and exchange of know-how and supporting co-operation on regional, national and international level, the CBL tries to accomplish its goals. The goals of the CBL are to stimulate the application of organic farming methods, and to stimulate the use of organic food. Furthermore, the CBL contributes to the development and improvement of the organic sector. In summary, the CBL promotes organic agriculture, provides education, practical information and stimulates the increase of organic agriculture in society.

Sano y Salvo is an association of ecologically farming families in SE Nicaragua, a 'biosphere of humankind'. 15% of the families are indigenous families (Rama). We grow food crops organically; the cash crops (up to 30 different ones) are grown in ecological, sucesional agroforestry plots. Hair sheep, pigs and all kind of poultry are the farm animals. Sano y Salvo's farms are examples of agro-biodiversity. By protecting natural biodiversity, forests, water, climate, we make migration unnecessary. Sano y Salvo is involved in media work and lobbys locally, regionally and nationally. We process most of and market our produce ourselves. The hazardous project of an interoceanic channel is threatening an important part of the membership since 2014.

Capacity building funded by donors and dissemination of research finding via annual conferences. We have had 7 annual conferences in various universities located in different parts of the country. Our major source of income comes include annual members dues. On average, participants in each conference is 50 and that amount to about 50,000 naira (equivalent of about US\$300). However, sale of annual proceeding is normally income to off-set LOC expenditure. The annual conferences take place September to November each year. Although, we have zonal coordinators in each geographical zone of the country and each can organize training independently of the national body, the income generated does not come to the national body. Previous conferences and venues 1. The first conference was held 2005 in University of Agriculture, Abeokuta, the second annual conference held at University of Ibadan, 2006 and the third in University of Agriculture, Abeokuta

NEGROS ISLAND SUSTAINABLE AGRICULTURE AND RURAL DEVELOPMENT FOUNDATION, INC (NISARD), is the prime mover in promoting organic agriculture development in the island of Negros, home to more than 4 million Filipinos in the central Philippines. NISARD's mission is advocating for and promoting organic agriculture across the island as a vehicle for rural development, food security and poverty alleviation. It evolved out of the serious socio-economic and environmental problems faced by Negrenses. Soil degradation due to monoculture and chemical farming, unabated deforestation that threatens remaining endemic flora and fauna, marginalization of small farmers due to dependency to expensive chemical farm inputs, depletion of marines resources caused by overfishing, and other malpractices, have put the Island's natural resources in dire straits. And it takes its heavy toll on small, marginal farmers who comprises the majority of the island's population and highly dependent on agriculture.

Tel: +63 0622141879

www.zamboangadelsur.gov.ph

The Provincial Government of Zamboanga del Sur is a local government unit that covers 1 city and 26 towns with around 950,000 population. Led by Governor Antonio H. Cerilles since 2010, the provincial government has adopted organic agriculture as its main strategy in alleviating the people from poverty. In the uplands, it aims to rally the farmers to produce organic cassava intercropped with vegetables and corn thru a sustainable hole-method. In the lowlands, it aims to rally the farmers to produce organic rice thru rice-duck farming. In the coastlines, it aims to rally the fisher folks to conserve biodiversity while utilizing marine resources. Moreover, to rally the youth in its poverty-alleviation program, it mobilizes all the local leaders in the province down to the village level to equip them thru scouting and sports with proper values, knowledge and skills that they may become God-fearing, law-abiding and productive citizens and contributors to nation building.

The Bio – Romania Association is a Romanian non-profit, non governmental, apolitical and independent legal entity. The association was formed in September 2008 by merging 18 founding members: associates, cooperatives, companies, manufacturers, exporters, academics and personalities from the field of organic agriculture. The Association advocates for sustainable development of agriculture and rural space, education, information and consumer awareness of the benefits of organic farming for both human health and natural health by promoting the consumption of certified organic foods.

Organic Market is a small chain of shops that sell organic products only in Moscow, Russia. We sell products certified by international certification bodies, but our main focus is the promotion of local and regional organic production and trade. Our goal is to promote organic principles in Russia, where awareness of the importance of sustainable production is still very low. We are planning to set up an organic certification program, which will be in strict accordance with IFOAM norms.

USOFA is the Union of Slovenian Organic Farmers Association, founded in 1999. It is the largest Slovenian organic producers' organization. The individual members of regional associations are farmers, who farm according to USOFA standards on the whole farm. Organic processors that fulfill the standards of the organization may become USOFA licence partners. USOFA standards for production and processing are based on international IFOAM Basic Standards. They meet the national and European Union requirements for organic production and are in several aspects even more demanding.

The Namyangju Organic Agricultural Science Museum was opened in September 2011 in conjunction with the hosting of the 17th IFOAM Organic World Congress. The museum is the only one of its kind in Korea and highlights the importance of organic agriculture. It undertakes many education programs to raise public awareness. The museum has grown to become a local landmark and many events including international seminars are often held on its premises.

The Good Market is a Sri Lankan social enterprise that promotes products and services that are "good for the planet, good for the country, and good for you." It started as a weekly event for vendors that meet Good Market standards. All farm products at the Good Market must be organic. The Good Market now has two weekly markets and an organic and natural food shop that's open 7 days a week. Good Market producers and consumers have come together to create an organic Participatory Guarantee System based on IFOAM standards.

Using EM technology various agricultural activities can be carried out; tomatoes, water melons and sunflowers were planted at different rural areas around Khartoum, sorghum and groundnut were grown in rainfed mechanized farming in central Sudan. Now the NGO has received a letter of no objection pertaining to clean development mechanisms and has approached a lot of farmers association to encourage them to carry out organic agriculture activity. The NGO has recruited graduate students exposed to organic agriculture studies to join the NGO and to help to mobilize farmers in such activities.

Africa Cooperative Action Trust (ACAT) Lilima is a Christian rural community development agency working to empower disadvantaged rural people especially women and children to improve their quality of life. ACAT was established in Swaziland in 1982, after its founding in KwaZulu Natal in the year 1979. ACAT's approach to people development is based on the mobilisation of people to form savings groups that meet weekly. Savings are used for self-help purposes. ACAT uses participatory methods in their community development interventions. This is done to promote strong ownership by community beneficiaries.

Ekologiska Lantbrukarna ("Organic Farmers") is Sweden's national organic trade organization. We work for policies, regulations and a market that guarantee ease of organic production. We act as a unifying force for all producers, large and small. With in-depth knowledge of the sector's politics and market, we help to influence the future by developing ideas for increased sustainability in agriculture and profitable organic companies. We have local chapters in 21 districts in Sweden, from Skåne to Norrbotten.

Bio Suisse is a private-sector organization and the federation of Swiss organic farmers. This umbrella organization counts 32 organic farmers' associations among its members, as well as the Research Institute of Organic Agriculture FiBL. We develop common and uniform standards for agriculture and processing e.g. the common label, 'Bud' (German: Knospe). Organic produce carrying the Bud label has a market share of about 60% in Switzerland. More than 800 processing and trade companies have a licence contract with Bio Suisse to use this label.

The Institute for Marketecology (IMO), Switzerland is one of the first and most experienced international bodies for the inspection, certification and quality assurance of sustainably produced products. IMO has been active in the field of organic certification world-wide for more than 20 years. Today, IMO is also renowned in the sectors of food safety, fair trade/ social accountability monitoring, natural textiles, timber/ forestry, fisheries/ aquaculture and wild collection. We offer inspection/certification according to more than 70 different ecological and social standards. IMO is a department of the Swiss Bio-Foundation and is based at Weinfelden (CH). This is the lead office of the IMOgroup AG that has 9 fully fledged international companies and more than 20 smaller offices, mainly in developing countries. The IMOgroup AG employs more than 400 experts for the certification of operations in more than 90 countries.

Organic Agriculture Certification Thailand (ACT) is an independent, non-profit organization that works with inspection and certification in organic agriculture in Thailand and Asian regions. ACT has its own standards that have been accredited by IFOAM, by Canada Food Inspection Agency (CFIA) and equivalent with the EU regulation 834/2007 through IOAS assessment. ACT is in the first CB list that was approved by the EU Commission in Oct 2011. In addition ACT provides service in Certification Alliance to support the operators in Thailand and Asian region to market certified organic products worldwide. For more information please visit our website at www.actorganic-cert.or.th.

A Thai social enterprise working to bring together sustainable farmers and community enterprises with consumers. We focus on the promotion of organic agriculture and development of fair trade markets. We provide technical and managerial support for small-scale producer groups to convert to organic agriculture, coaching them to prepare for certification, organizing the organic supply chain, and are involved in the domestic market and exports. We also offer consultancy services to public and private sectors in Asia for organic agriculture development and fair trade.

Sampran Riverside (formerly Rose Garden Riverside) is a family-run property just 30 km west of Bangkok. Back in 1962, the business started as a supplier of roses to the Bangkok flower markets. Since then, it has grown gradually to a 70-acre riverside property where visitors can experience authentic Thai way of life and learn about our local wisdom. Sampran Riverside is more like a community than a "typical" resort with IFOAM certified organic gardens and a 10-acre organic farm.

ETO was founded in 1992 in Izmir/Turkey by farmers, consumers, processors, traders, inspectors, researchers and technical staff as the umbrella organization to promote rapid and healthy development of organic agriculture in Turkey. Today ETO has 272 members coming from different parts of Turkey. 7 of them are institutional members. To date, the Association has organized many short courses, seminars, conferences and panel discussions, participated in fairs, prepared training material, organized 4 National Symposiums on Organic Agriculture in 1999, 2001, 2006 and 2010, coordinated or took part in national or international projects on the adoption of organic agriculture especially in sensitive areas and on capacity building. ETO also organized meetings (3. Mediterranean Conference on Organic Agriculture in 1992 , MOAN meeting in 2007) at international level. ETO partners many national fairs, exhibitions (e.g. Exponatura , Ekoloji, Naturel , Ecology Izmir).

Cagatay Demir, MS, RD, founder of Mutlu Diyet Klinigi, has helped many clients over years to löse weight. Rather than following a standard, boring, repeating and unsuccessful diets, he has shown people how it is possible to lose weight in a happy and healthy way. Since he started working, he realized that most of his clients were seeking for healthy, natural and/or organic products. They knew that they could purchase them from certain markets, however; these places were not always reachable or people don't have time to go and buy them. In regards to that, Mr. Demir took a big step in 2009 and found his own farm called Mutlu Ciftlik. This small organic farm is situated in Ovacik Village, Sile. After calculating his clients' nutritional needs, Mr. Demir picks the right products from the farm and sends them to their home/work every week in reefer containers. In addition to that, they get healthy recipes in the packages, so that they can enjoy these fresh products in a healthy, happy way.

The company was established in 1999 for marketing organic honey produced within the context of an environmental and social responsibility project in and around the Artvin Camili region (also known as MACAHEL), a UNESCO declared Biosphere Reserve. In order to protect the extensive old growth forests in the region, alternative revenue generation projects, other than timbering were undertaken, apiculture being one of the most important ones. Genetically pure Caucasian Bees were discovered in the region and queen bee rearing is also undertaken and distributed to the northern belt of Turkey to increase the honey yield in the hives. Temari, in partnership with the TEMA Foundation Inc. (largest environmental NGO in Turkey) and the AliNihat Göküçit Foundation, provides technical training and certification (by IMO) to beekeeping families, providing them with all their requirements and pre-financing, etc, and buys the harvested honey products at Fair Market Values.

Down to Earth has been providing various organic and chemical free product options in food textiles & cosmetics to the residents of UAE since early 2011. We are a recent venture and aim to educate the consumer on making choices that are responsible towards both; the environment and society. Food grown without the use of harmful chemicals & pesticides contributes to the environment and the farmer's health. We buy directly from the farmers who grow organically, hence supporting their livelihood.

Ecocert is an inspection and certification body established in France in 1991. Ecocert Inc. was created in 2008 in San Francisco, California, as a subsidiary of Ecocert Group. From its creation, Ecocert has specialized in the certification of organic agricultural products and has diversified its range of services to include organic and natural cosmetics, ecoproducts, fair trade, green spaces, etc. Ecocert Inc. answers to US clients' request to receive a worldwide, well-known certification brand. In 2010, Ecocert Inc. continued to develop its activities in the USA by purchasing Indiana Certified Organic LLC. Indiana Certified Organic began offering organic certification in 1995 and was one of the first certification agency to be accredited by the National Organic Program.

At Greenwillow Grains, we grow and mill organic grains, beans and seeds. All of our products are 'identity preserved'. That is, the 'farm of origin' name is printed on each label and we can trace our flour, and all other products, to the seed that was used and the field in which it was grown. Our products are third party tested and consistently contain significantly more nutrients than comparable products. Gluten-free available. Farm-direct and domestic fair trade certified. Organic certification by OTCO.

Fax: +1 831 426 6670

www.ofrf.org

At Organic Farming Research Foundation (OFRF), our vision is clear - organic farming is the leading form of agriculture in America. Since our founding in 1990, OFRF exists so that farmers have: improved organic farming practices; a relevant and vital support network; Federal policies that support organic research, education and programs. A OFRF we work to increase the number of organic farmers in America as well as certified organic acres and organics in our nation's food economy. OFRF has four areas of focus: policy (grow organic champions in Congress and federal agencies); education (integrate organic farming programs into all agricultural universities); research (provide research that is relevant and responsive to the organic farmers' needs); community (cultivate a broader and deeper connection among organic supporters). As the leading national non-profit of the American organic farmer, OFRF is building the infrastructure to ensure the success of organic farmers.

Founded in 1997 as a nonprofit organization, the Organic Materials Review Institute (OMRI) provides organic certifiers, growers, processors, and suppliers an independent review of products intended for use in certified organic production, handling, and processing under U.S. and Canadian organic standards. Allowed products appear on the OMRI Products List® or OMRI Canada Products List®. OMRI also provides technical support and training about the material review process and standards for organic professionals around the world.

United States of America

Tel: +2078097530

www.osgata.org

OSGATA is a national farmer-run membership organization dedicated to protecting, promoting and developing the organic seed trade and its growers, assuring that the organic community has access to excellent quality organic seed, free of GE contaminants and adapted to the diverse needs of local organic agriculture. From 2011-2014 OSGATA acted as lead plaintiff in the landmark lawsuit, OSGATA et al. v. Monsanto. In 2014 OSGATA published a peer-reviewed handbook, Protecting Organic Seed Integrity.

The Sustainable Food Trade Association engages people in the organic food trade to define and drive excellence in environmentally sound, socially just business practices using a systems-based approach. Members are a diverse mix of organic producers, processors, manufacturers, distributors; related vendors, suppliers, and retailers; aligned organizations and individuals. We support our members in implementing innovative sustainable business practices across the supply chain, from farm to retail. Our mission is to build the capacity of the organic food trade to transition to sustainable business model.

ZOPPA promotes organic agriculture as an alternative farming system that removes dependency on chemical and seed companies, improves people's health, balances the ecosystem while giving a livelihood even to the poor who cannot afford the chemicals. In an endeavour to promote organic agriculture ZOPPA does the following: 1. Lobby and advocate for a policy that supports organic agriculture in Zimbabwe; 2. Establish and monitor an agreed set of organic standards; 3. Facilitate market linkages for organic produce; 4. Provide relevant information on organic agriculture; 5. Coordinate organic agriculture activities for the growth of the industry; 6. Facilitate support structures, involvement for the growth of the organic sector (research, bio-inputs etc.). In doing this ZOPPA hopes to make a contribution towards a nation that is committed to using natural means of agriculture to ensure a healthy future for the land and its people.
